

CDL License Training

Full Service CDL training program. The theory portion of the course is provided online to obtain your ELDT (Entry Level Driver Training) and your permit test preparation. Additional time will be spent with students who require assistance in obtaining their learner's permit. Once you have obtained your permit, you will start your training on a simulator before getting behind the wheel of a real truck to help learn the gears and simulate the handling of the truck. You will have 8 hours of individual behind the wheel driving in city, local and highways with an additional 12 hours of backing skills and pre-trip training. You will learn to drive on a manual transmission but will have the option to train on an automatic if necessary. The instruction is PennDot approved to help prepare students to pass their on-the-road test.

On-the-Road Training Facility is Independence Driving School located at 2756 Rimrock Dr., Stroudsburg, PA
